

Strategies, Concepts and Technologies For Planning the Urban Future

22 - 25 April 2009 Centre de Disseny de Sitges Catalonia/Spain

CONFERENCE PROGRAMME

14th International Conference on Urban Planning, Regional Development and Information Society

WELCOME TO SITGES

Jordi BAIJET I VIDAL, Mayor of Sitges, Catalunya/Spain

Welcome to Sitges! The say the secret is in the microclimate that seems to have settled in Sitges. The Garraf Mountains and the sea breezes keep the sky clear for around three hundred days of the year. Others add the nights, the beaches, good links to Barcelona, the peacefulness and, of course, its people.

The verb "to negotiate" I derived from the Latin expression "deny free time" or in other words, keep your nose to the grindstone. Taking the word literally you may think that Sitges is not the best place to deny people free time. However, it is more a case of combination than denial, and you only have to look at the statistics to see it. Sitges has more than five thousand hotel beds of all different styles throughout the town, half of them 4 and 5 stars.

The statistics also show the town's ability to organize, with more than two thousand places available for all kinds of events, from meetings to conferences, conventions and gymkhanas (yes, gymkhanas).

However, these statistics do not reflect dips in the sea or dinners by the beach, useful tools to be able to see the business world form a much less stressful viewpoint. Well, Sitges is strongly interested in the topic of "The future of Cities" and it is a pleasure to host REAL CORP 2009. I am sure that the Sitges spirit will provide a fruitfull soil for new solutions and fire the imagination of the participants!

WELCOME TO REAL CORP 2009

Manfred SCHRENK, Chairman CORP, Managing Director of CEIT ALANOVA – Central European Institute of Technology, Dept. of Urbanism, Transport, Environment & Info Society

If an annual international congress has been successful for more than 12 years in winter time Vienna, there must be more than just the attractiveness of the venue ... – but of course a great venue contributes a lot to a successful congress.

With the foundation of a project office of ISOCARP, the International Society of City and Regional Planners, and the involvement in numerous projects and activities on the future of cities Sitges is a pioneer and model for many other cities, but it is even more important that Sitges shows us every day how to handle the challenges of everyday life and keep an open, cosmopolitan mind — so there is no better place for a congress under the topic "CITIES 3.0: smart, sustainable, integrative".

CORP conferences are well known for their special vibrant atmosphere and for their being ahead of the time in the topics — and I am sure we will see many

outstanding ideas of cities and regions on how to become smart, sustainable and integrative and how to improve the quality of life.

14th International Conference on Urban Planning, Regional Development and Information Society

KEYNOTE ON CITIES – THE INNOVATIVE PLACES OF MANKIND

Greg CLARK, United Kingdom, Keynote "Making Cities And Regions Work"

Greg Clark helps cities, regions and their partners to deliver effective strategies based on his experience of:

- Working in London for 15 years in leadership positions within city agencies.
- Visiting and reviewing over 100 cities and regions around the world in the past twelve years.
- Advising 20 individual cities in four continents on strategies and tools for success.
- Advising National/Federal Governments and Inter-Governmental Organisations on how they help cities and regions to succeed.

ISOCARP WELCOMES REAL CORP 2009

Pierre LACONTE, Belgium, President ISOCARP – International Society of City and Regional Planners

It is my pleasure to address to you all my personal greetings at the REAL CORP 2009, with a special word of thanks to Mr. Jordi Bajet i Vidal, the Mayor of the hosting town of Sitges. It is in the overall interest of us planners to reconsider the current situation and the future of cities again and again. Therefore ISOCARP is very happy to be a co-operation partner of this year's CORP conference with the important topic of CITIES 3.0: SMART. SUSTAINABLE. INTEGRATIVE. Planning experts from all over the world will present and exchange their ideas on the urban future. Allow me to already draw your attention also on the ISOCARP congress "Low Carbon Cities" in Porto/Portugal in October 2009.

I wish all of you some interesting days in Sitges, with inspiring presentations and discussions, and getting in touch with planners with different cultural backgrounds. Finally may I address a special word of thanks to the conference organiser Manfred Schrenk and his CORP team from Austria.

KEYNOTE ON LOW CARBON CITIES (TOPIC OF THE ISOCARP 2009 CONGRESS)

Chris GOSSOP, UK, Board Member ISOCARP General Rapporteur for ISOCARP 2009 Congress in Porto/Portugal

The environmental effects of man's activities, in the context of the world's expanding cities and city regions, is to be seen as a key issue for planners around the globe. It is those cities and agglomerations that are undoubtedly the source of a large share of the greenhouse gas emissions that underlie climate change; at the same time, these are the places that are often the most vulnerable to its effects.

Time is short and if we are to avoid the worst effects of anthropogenic climate change, we must act and act quickly. The challenge is to use (and reuse) our resources, including land, far more efficiently and, in particular, to move towards low carbon cities.

14th International Conference on Urban Planning, Regional Development and Information Society

REAL CORP 2009 CONFERENCE TOPIC

CITIES 3.0 – Smart, Sustainable, Integrative

Strategies, concepts and technologies for planning the urban future

REAL CORP 2009 asks for future perspectives of cities under the general topic "CITIES 3.0: SMART, SUSTAINABLE, INTEGRATIVE. Strategies, concepts and technologies for planning the urban future". Although major parts of the world are blessed to live in peace and economic wealth at the beginning of the 21st century, the world is facing serious challenges like

- ongoing globalisation with fundamental changes in economic and working environment around the globe,
- demographic changes, like aging population in Europe and rapid urbanisation in Asia.

In a changing world cities have to advance and to adopt to stay what they are and have always been:

- drivers of innovation and social improvements,
- centers of economic activities, science, knowledge and arts,
- and the best places to live for the vast majority of people.

CITIES 3.0

REAL CORP 2009 deals with the challenges and perspectives for cities and asks how they might look like and be organized and managed in the future, with a special focus on the role of information and communications technologies in urban development. The major questions to be dealt with at the conference in April 2009 and related to which we invite your contributions are:

- What makes cities smart, sustainable and integrative and livable?
- How can cities and regions take advantage of globalisation and keep their local character how to "gLOCALize"?
- How can planners help cities find the way to a successful future?
- Government, governance, mediation, participation and planning are there models for short-term and long-term perspectives?
- Are there technologies that can support the above-mentioned goals?
- Are there best practises for "livable cities of tomorrow"?

ABOUT CORP

CORP conferences have been held annually since 1996 and are Europe's major congresses on Urban Planning, Regional Development and Information Society. The events are extraordinarily interdisciplinary, whereby usually a lot of new ideas and projects are generated. About 400 experts from around the world from the fields of urban planning, transport

planning, information and communication technologies, architecture, ecology, real estate, GIS and surveying, multimedia technologies and more meet to discuss current tasks and topics on urban planning, regional development and information society in an international and interdisciplinary conference. Speakers and participants represent private companies as well as research institutions and public administration.

CORP 2009 will be co-organized by ISOCARP, the International Society of City and Regional Planners (www.isocarp.org), CEIT ALANOVA and CORP association (www.corp.at). The programme includes expert lectures, round tables and workshops, business presentations and exhibitions as well as extensive social events.

CONFERENCE SCHEDULE

Wednesday, 22 April 2009

	11001110011111/1 = 7 1p111 = 007
08:30-10:00	Registration
10:00-12:00	Opening and Keynote Speech
12:00-12:30	Short Coffee Break
12:30-14:00	Presentations (3 Parallel Sessions)
14:00-15:00	Lunch Break
15:00-16:30	Presentations (4 Parallel Sessions)
16:30-17:00	Short Coffee Break
17:00-18:30	Presentations (4 Parallel Sessions)

Thursday, 23 April 2009

09:00-10:30	Presentations (4 Parallel Sessions)
10:30-11:00	Short Coffee Break
11:00-12:00	Presentations (4 Parallel Sessions)
12:00-13:00	Keynote Speech
13:00-14:30	Lunch Break
14:30-16:00	Presentations (4 Parallel Sessions)
16:00-16:30	Short Coffee Break
16:30-18:00	Presentations (4 Parallel Sessions)
afterwards	Evening Reception

	Friday, 24 April 2009
09:30-11:00	Presentations (3 Parallel Sessions)
11:00-11:30	Short Coffee Break
11:30-13:00	Presentations (3 Parallel Sessions)
13:00-13:30	Short Coffee Break
13:30-15:00	Presentations (2 Parallel Sessions)
15:00-15:45	Closing Session
	Saturday, 25 April 2009
09:00-14:00	Guided Walk, Bus Tour

Wednesday, 22 April 2009 Registration & Come Together at Design Center Sitges REAL CORP 2009 Opening & Welcome by Representatives of Organizers and Partners 10:00 Jordi BAIJET I VIDAL Mayor of the City of Sitges Joaquim NADAL I FAMERAS (solicited). Minister of Town and Country Planning and Public Works, Government of Catalunya Pierre LACONTE. President ISOCARP - International Society of City and Regional Planners Manfred SCHRENK. Director CORP & CEIT ALANOVA - Central European Institute of Technology, Dept. for Urbanism, Transport, Environment & Information Society **Keynote Speech:** Chris is a British town planner who has combined work in a variety of central and local government posts, as well as in a pressure group, the Town and Country Planning Association, with outside interests in the field of international planning. He is Vice-President of ISOCARP and serves on the International **Low Carbon Cities** Committee of the Royal Town Planning Institute. Chris is General Rapporteur for the upcoming ISOCARP-World-Congress in Ocotber in Porto under the topic "Low Carbon Cities". **Chris GOSSOP** DG Information Society and Media, European Commission **Keynote Speech:** Loris Di Pietrantonio is currently Policy Assistant to Director for ICT addressing Societal Challenges at the European Commission - DG Information Society **Digital Inclusive** and Media. He has been recently involved in the design of policies for digital inclusion and impact assessments of policy Initiatives for digital inclusion. He **Cities for Sustainability** has also worked on policy and programme evaluation in the area of information society and transport. His previous experience is in the area of design of

research and innovation strategies and management of research projects.

14th International Conference on Urban Planning, Regional Development and Information Society

SPECIAL WORKSHOP

TERRORISTIC THREAT: AN ULTIMATE CHALLENGE TO THE URBAN FUTURE

Chair: Vasily V. Popovich

Deputy Director for Research & Head of OOGIS Laboratory, St. Petersburg Institute for Informatics and Automation of the Russian Academy of Sciences (SPIIRAS), St. Petersburg, Russia

The devastating terrorists' attacks against New York and Washington, DC in 2001 became a turning point in bringing the mankind to the awareness that any place in the World is equally imperiled and consequently vulnerable in the face of terrorism, that currently is understood as a systematic use of terror (a means for coercion), threat of violence and/or other assaultive offences and acts often committed in the name of political (ideological) expediency. The above awareness evidently made the mankind focus upon monitoring the terrorists and predicting the malicious intents, operational capabilities, structures of terrorists' groups, as well as upon preventing the terrorists' attacks, that has become the biggest challenge especially for the developing urbanization.

Most definitions of the terrorism only consider the acts aimed at instilling terror and perpetrated for the momentary ideological (as opposed to the separate attacks) and deliberately target or disregard the safety of non-combatants (civilians). The modern urbanization issues are being considered with due account for the potential terroristic threats, as any location being densely populated or specified by a significant people's accumulation (masses presence) is being subjected to the terrorists' impacts. So, monitoring the terroristic threats arising from a wide range of organizations as well as developing versatile methods and scientifically justified approaches aimed at preventing the terrorist acts is vitally important.

The workshop assumes considering the complex of problems related to the terroristic threats in megalopolis including those at public and cargo carriers and transportation hubs (terminals and junctions). At that certain theoretical, techno-

logical, and practical aspects in the analysis of and counteraction to the above modern challenge are proposed for the discussion including though not limited to:

- the impact of the existing and emerging legal regulations upon the terroristic threat monitoring;
- developing the theoretic basics for a new research lead in studying terrorism and its manifestations in a present-day megalopolis;
- analysis of a potential terrorist's personality and terrorists' groups as well as the terrorism's origination causes and sources;
- study of the safety assurance issues in locations specified by significant people's accumulation;
- study, analysis and monitoring of terrorists' internet sites and networks;
- analysis of terroristic threats at transportation hubs (airports, railway stations, sea terminals, etc.) and at public, private and cargo carriers;
- analysis of the terroristic threats at the hazardous essential facilities like hydro-electric and nuclear power plants, chemical and other industries, dykes, etc.
- methods of collecting information on the current situation and grading its accuracy;
- mathematical methods for a potential terroristic threat detection and identification;

14th International Conference on Urban Planning, Regional Development and Information Society

ANNOUNCEMENT

45th ISOCARP INTERNATIONAL CONGRESS

FEUP - PORTO -PORTUGAL

Low Carbon Cities

18-22 October 2009

At the invitation of the Porto Local Organising Committee, ISOCARP will hold its next congress in the city of Porto, Portugal, in October 2009. The theme, proposed by our hosts - "Low Carbon Cities"-, is particularly timely, as reduction in carbon emissions and energy are key concerns of planning for future urban growth worldwide, not least in Europe.

For decision-makers and their planning advisors, it raises the challenge of making compact and liveable places, caring for people and nature and favouring social inclusion.

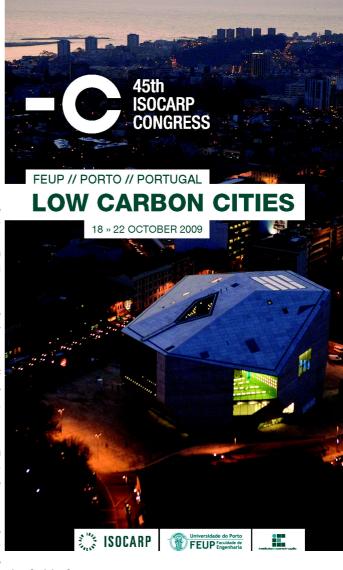

Considering the wide experience of Portugal in the use of European regional funds, the findings of the congress might be of consequence for the new policies presently being considered towards a more sustainable regional development.

It also raises professional issues about assessing carbon emissions and energy production and consumption generated by buildings and neighbourhoods and how to make the best use of carbon trading schemes.

This in turn opens the field to a new profile of participants, interested in exhibiting and explaining the latest technologies related to planning for low carbon urban development,

as the German pavilion in Saragossa 2008 successfully did in the field of water resources.

We have high expectations for this congress and look forward to welcoming many of you in Porto. Pierre Laconte, President of Isocarp

Young Planning Professionals Programme prior to the congress 15 to 17 October 2009

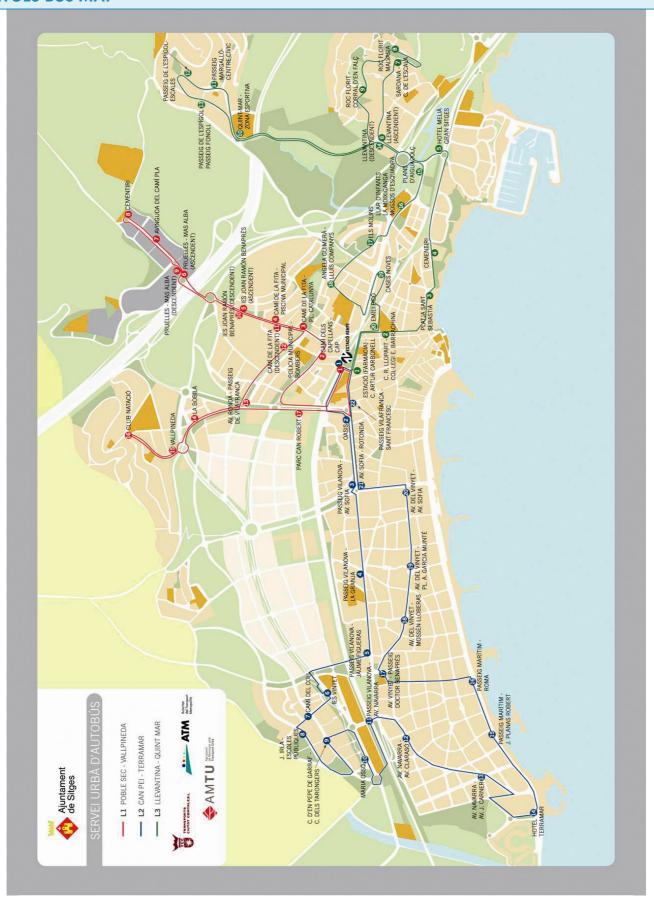

Important Dates

January 2009 – Call for Papers, Congress Registration Brochure 30 April 2009 – Abstract deadline submission 31 July 2009 – Deadline full paper submission

SITGES BUS MAP

PUBLIC TRANSPORT: BUS AND TRAIN

L2 CAN PEI - TERRAMAR

The Sitges bus line L2 connects the train station (stop number 1), the Design Center (stop number 6) and a lot of downtown and coast-side hotels. For the other bus lines see the general Sitges bus map on the previous page. The bus line L2 is in operation Monday to Friday from 07:00 to 22:00. On Saturday, Sunday and Holidays bus operation starts at 09:00.

Buses go every 30 minutes, starting at stop number 1 at ##.00 and ##.30.
