

PLAN IT SMART CLEVER SOLUTIONS FOR SMART CITIES

“Smart Cities” has become a widely used term for the implementation of information and communication technologies (ICT) into the processes of cities and the built environment, aiming to improve the integration of the physical assets as well as social and environmental capital. Fired by several rankings there seems to be a competition for the title of the “Smartest City”. This kind of hype raises a lot of questions that REAL CORP 2014 will deal with.

- What does “Smart City” mean in terms of quality of life?
- How does it influence the economic perspectives?
- Are the concepts of sustainability and resilience part of “Smart Cities”?
- What about politics and administration, policies and governance?
- How do “Smart Solutions” influence the “hardware” of a city, the urban fabric?
- Last but not least: what is the role of urban/spatial planning in and for “Smart Cities”?

Can we **PLAN IT SMART** and find **CLEVER SOLUTIONS FOR SMART CITIES**?

In addition to the general topics mentioned before, REAL CORP 2014 will also deal with this questions and problems:

- Smart Cities/Smart Citizens – Who Needs What?
- Does “Smart” mean High-Tech?
- Existing/Evolving/Foreseen Technologies
- Business Models for Smart Solutions
- Long-Term Strategies and Plans vs. Short-Term (Re-)Actions and Tactics – the Role of Strategic and Spatial Planning for Smart Cities
- Density Matters – the Urban Fabric of „Smart Cities“ in the Light of Quality of Life, Sustainability and Resilience
- Smart Mobility – Smart Energy – Smart Environmental Technologies
- This Town ain’t Smart Enough for the Both of Us – Integration and Segregation in Smart Cities
- Data/Information/Knowledge Infrastructures – the Backbone of Smart Cities
- (Smart) City Rankings – why, how, by whom for whom, who cares?

ABOUT REAL CORP

REAL CORP conferences have been held annually since 1996. About 400-500 experts from around the world from the fields of urban planning, transport planning, information and communication technologies, architecture, social and environmental sciences, real estate, GIS, surveying and remote sensing and more meet to discuss the latest tasks and topics on urban planning, regional development and information society in an international and extremely interdisciplinary conference. **Conference languages are English and German.**

PAPERS AND PRESENTATIONS

REAL CORP 2014 is expecting around 150 reviewed and 50 non-reviewed papers for presentation at the conference. We offer a peer-review procedure for scientific papers. The reviewing procedure is an important tool in enhancing the paper quality and therefore the expert output of the REAL CORP conference in general. Papers are not only evaluated on scientific quality, but also with focus on practical relevance and “visionary approaches”. The group of reviewing experts comprises of researchers, practitioners and business experts.
